# News for Patients from the ASCO Annual Meeting [1]

Cancer.Net offers breaking news for patients about the cancer care and treatment advances announced during the American Society of Clinical Oncology (ASCO) Annual Meeting each year. The ASCO Annual Meeting is the platform for the release of thousands of scientific abstracts -- highly anticipated research news for many people, including patients, caregivers, and the general public.

To download and read about each meeting's research highlights in PDF format, download the *Research Round Up* newsletter using the list below.

To read online research highlights from each meeting and search by topic or year, visit Cancer.Net?s Research Summaries database [2]. To search ASCO's abstracts database, visit the ASCO website [3].

It is important to note that information contained in *Research Round Up* is not intended as medical advice or as a substitute for the treating physician's own professional judgment; nor does it imply ASCO endorsement of any product or company. In addition, because most of the treatments discussed in these articles are not yet available for widespread use, individuals should talk with their doctor to find out if a clinical trial for which a therapy is being offered is appropriate for them.
