

Gallbladder Cancer - Latest Research [1]

This section has been reviewed and approved by the [Cancer.Net Editorial Board](#) [2], 09/2014

ON THIS PAGE: You will read about the scientific research being done now to learn more about this type of cancer and how to treat it. To see other pages, use the menu on the side of your screen.

Doctors are working to learn more about gallbladder cancer, ways to prevent it, how to best treat it, and how to provide the best care to people diagnosed with this disease. The following areas of research may include new options for patients through [clinical trials](#) [3]. Always talk with your doctor about the diagnostic and treatment options best for you.

Immunotherapy. Immunotherapy, also called biologic therapy, is designed to boost the body's natural defenses to fight the cancer. It uses materials made either by the body or in a laboratory to improve, target, or restore immune system function. Current clinical trials are testing immunotherapy as a way to treat gallbladder cancer. Learn more about [immunotherapy](#) [4].

Gene therapy. Gene therapy is an experimental treatment that involves introducing genetic material into a person's cells to treat cancer. Gene therapy is being studied in clinical trials for many different types of cancer and for other diseases.

Chemotherapy and radiation therapy improvements. Currently, the effectiveness of chemotherapy and radiation therapy for the treatment of gallbladder cancer is limited. Clinical trials are evaluating new drugs for gallbladder cancer and trying to increase the effectiveness of radiation therapy.

Supportive care. Clinical trials are underway to find better ways of reducing symptoms and side effects of current gallbladder cancer treatments in order to improve patients' comfort and quality of life.

To find clinical trials specific to your diagnosis, talk with your doctor or [search online clinical trial databases now](#) [5].

The next section addresses how to cope with the symptoms of the disease or the side effects of its treatment. Use the menu on the side of your screen to select [Coping with Side Effects](#), or you can select another section, to continue reading this guide.
