[Small Bowel Cancer - Latest Research](#) [1]

This section has been reviewed and approved by the [Cancer.Net Editorial Board](#) [2], 08/2015

ON THIS PAGE: You will read about the scientific research being done now to learn more about this type of cancer and how to treat it. To see other pages, use the menu on the side of your screen.

Doctors are working to learn more about small bowel cancer, ways to prevent it, how to best treat it, and how to provide the best care to people diagnosed with this disease. The following areas of research may include new options for patients through clinical trials. Always talk with your doctor about the diagnostic and treatment options best for you.

Because small bowel cancer is uncommon, small bowel cancer-specific clinical trials may be hard to find. Some clinical trials on the diagnosis, treatment, and causes of [colorectal cancer](#) [3] may be open to people with small bowel adenocarcinoma.

Areas of current research include:

- **Radiosensitizers.** Researchers are investigating the use of radiosensitizers in the treatment of small bowel cancer. Radiosensitizers are drugs that make tumor cells more susceptible to radiation therapy, making radiation therapy more effective.
- **Immunotherapy.** As explained under [Treatment Options](#) [4], immunotherapy is being actively investigated for its best uses in treating small bowel cancer.
- **Palliative care.** Clinical trials are underway to find better ways of reducing symptoms and

side effects of current small bowel cancer treatments in order to improve patients' comfort and quality of life.

Looking for More About the Latest Research?

If you would like additional information about the latest areas of research regarding small bowel cancer, explore these related items that take you outside of this guide:

- To find clinical trials specific to your diagnosis, talk with your doctor or [search online clinical trial databases now](#) [5].
- Visit the website of the [Conquer Cancer Foundation](#) [6] to find out how to help support research for every cancer type. Please note this link takes you to a separate ASCO website.

The [next section in this guide is Coping with Side Effects](#) [7] and it offers some guidance in how to cope with the physical, emotional, and social changes that cancer and its treatment can bring. Or, use the menu on the side of your screen to choose another section to continue reading this guide.
