

Mobile Applications [1]

New Spanish-enabled version available!

Cancer.Net Mobile has been updated to include a Spanish-enabled version. Users whose primary device language is set to Spanish will now be able to use all of the award-winning features of the app in their native language, as well as select oncologist-approved cancer information. Currently available in iOS and Android versions.

Cancer.Net Mobile is a free app for iOS (iPhone, iPad) and Android and features:

- Guides on 120 types of cancer
- An interactive tool to keep track of questions to ask healthcare providers and record voice answers
- A place to save information about prescribed medications, including photos of labels and bottles (on camera-enabled devices)
- A symptom tracker to record the time and severity of symptoms and side effects
- A section featuring the latest videos, podcasts, and Cancer.Net Feature Articles
- Automatically updated content
- Optional passcode lock
- Optional iCloud backup for the questions, medications and symptoms entered into Cancer.Net Mobile (on iCloud-enabled iOS devices)

Reviews

?Where the app truly shines is in three key features: Ability to store questions, medications and symptoms. The way this app implements these key features is absolutely stunning, and makes the application a must have for cancer patients and their family members.? -iMedicalApps (See thefull iMedicalApps review[4].)

"Cancer.net app is a wonderful resource for patients. It provides information on specific cancers, provides a place to write questions, write/record answers, list medications, record symptoms and more." - thedoctorweighsin.com

?As a cancer survivor?I find this to be a great tool. The information is updated and I love that I can use it to save questions and have easy access to resources.? -App Store user
