

Surgery [1]

This section provides information on the following topics:

What is Cancer Surgery? [2]

This article provides an overview of the basics of surgery.

What to Expect When Having Surgery [4]

This article outlines what you will experience before, during, and after treatment.

Anesthesia [6]

Anesthesia is medicine that keeps a person from feeling pain during medical procedures, such as surgery or other tests that diagnose cancer. There are several different types of anesthesia. The type you receive will depend on the procedure you are having and your overall health.

Side Effects of Surgery [8]

This article describes the side effects of this treatment.

Reconstructive Surgery [10]

Many people require reconstructive surgery to help restore the function and appearance of a specific area of the body after cancer treatment. This article describes common reconstructive procedures.

Understanding Colostomies [11]

This article describes the surgical procedure for a colostomy, different types of colostomies, and suggestions for caring for and living with a colostomy.
