Tell your patients about the doctor-approved PATIENT INFORMATION WEBSITE FROM ASCO

Cancer.Net® brings the expertise and resources of the American Society of Clinical Oncology (ASCO®) to people living with cancer and their caregivers. With its timely, comprehensive information, Cancer.Net aims to help patients and families make informed health care decisions. Find authoritative, trusted information by visiting www.cancer.net.

Authoritative
All content on Cancer.Net is regularly reviewed and approved by an editorial board composed of more than 150 oncologists and oncology professionals.

Comprehensive
Guides to more than 120 types of cancer and cancer-related syndromes, plus information on treatments, clinical trials, and side effects.

Timely
Keep up to date with blogs and podcasts on the latest cancer topics.

Compassionate
Sections of Cancer.Net are devoted to the topics of coping, survivorship, and caregiving.

Mobile
The free, award-winning Cancer.Net Mobile app helps patients manage their care.

Spanish
A wealth of content in Spanish is also available, visit www.cancer.net/es.
Bring valuable **CANCER.NET** information INTO YOUR OFFICE OR WAITING ROOM

The trusted information from **Cancer.Net** is also available to your patients in print format through the **ASCO Answers** patient education series. Many oncology practices provide these materials to enhance patient learning after their office visits, so patients can learn more about their diagnosis and get practical tips for navigating cancer care.

**Equip your patients with the information they need today!**

**ASCO Answers** materials include award-winning **GUIDES, FACT SHEETS, and BOOKLETS**, covering a broad range of important and popular topics in cancer care. **ASCO MEMBERS SAVE 20%** on all patient education materials. **SHIPPING IS FREE** within the United States.

New and updated products are added regularly. Visit [www.cancer.net/estore](http://www.cancer.net/estore) to see what’s new.

If you have questions about patient education materials, please email customerservice@asco.org or call 888-273-3508.
5 stages for breast cancer: stage 0 (zero), which is called noninvasive cancer or ductal carcinoma in situ (DCIS), and stages I through IV. The stage is a way of describing where the cancer is located, how much the cancer has grown, and if or where it has spread. There are factors, such as where the cancer is located in the body, how big it is, if it has spread, and whether it has more than one tumor. Doctors usually use a number from 1 to 4. Cancer cells that look a lot like healthy cells have a lower number, or grade, than cells that look very abnormal. A lower grade means the cancer is less likely to grow and spread quickly. Cells that look very different from healthy cells are more likely to grow and spread quickly. The stage and grade can help you and your doctor choose the best treatment plan and decide whether you will benefit from experimental treatments. A treatment plan based on the stage and grade of the cancer can also help you understand your cancer journey better. If you want to learn more about the stage, grade, and how they are used to plan your treatment, talk to your doctor. There is a lot of information about cancer available, including ASCO Answers, a collection of oncologist-approved patient education materials developed by the American Society of Clinical Oncology. It includes facts, myths, and misconceptions about cancer and its treatment. You can find more information at www.cancer.net. These comprehensive guides describe diagnosis, treatment, side effects, and psychosocial effects.

- **ASCO Answers: Caregiving** helps caregivers learn about their role and how to provide ongoing support as the patient’s needs change. Includes workbook pages to help caregivers stay organized.

- **ASCO Answers: Cancer Survivorship** discusses the psychological, physical, sexual, financial, and work-related challenges of survivorship. It covers the importance of follow-up care and describes rehabilitation and support services. Includes blank treatment summary and survivorship care forms.

*Available in Spanish (online PDF only)*

**ASCO Answers Guides to Cancer** are available in packs of 25 guides for $20.
Advanced Cancer Care Planning helps health care professionals explain an advanced cancer diagnosis and treatment options available through the course of the patient’s illness. It also helps guide patients and their families through the necessary steps and highlights the importance of finding support through their health care team.

Managing Your Weight After a Cancer Diagnosis: A Guide for Patients and Families empowers patients to talk with their health care team about losing weight and provides resources to help patients succeed. Covers different weight loss methods, common challenges to losing and maintaining weight, emotional challenges, and tips for talking with the health care team.

Managing the Cost of Cancer Care offers an overview of the main financial categories for cancer care, an easy-to-understand explanation of health insurance benefits, information about the Affordable Care Act and cancer, tips for organizing financial information, a list of financial resources, and a cost and insurance dictionary.

Palliative Care shows how supportive care is used to manage symptoms and side effects, help with practical concerns, address spiritual questions, and support family, friends, and caregivers. It also provides advice about accessing palliative care services, questions to ask the health care team, and a list of national organizations that can help.

Managing Cancer-Related Pain explains the importance of pain relief, including the causes of pain and its diagnosis. Pain medications are covered extensively, including medication types, safe handling, and managing multiple prescriptions. Self-care and support methods are discussed, as well as how to effectively communicate with the health care team about issues with pain.

Stopping Tobacco Use After a Cancer Diagnosis helps patients talk with their health care team about quitting and gives them the resources they need to succeed. Includes an overview of the benefits of stopping tobacco use, discussion of the available treatments and resources, and suggestions to help patients begin working on a plan to quit.

ASCO Answers Topic-Specific Booklets are available in packs of 50 booklets for $20.
